

Investment objective

To seek a combination of long-term capital appreciation and income but with a focus on income, with a medium risk investment profile.

Benchmark

The Fund is benchmarked against the MSCI PIMFA Income Index (Total Return) and will take active positions relative to this index on both asset allocation and stock selection. The Fund's broad asset allocation (split by equities, fixed income and alternatives) will typically be restricted to a range, relative to the benchmark, set by the CSI Investment Committee.

Investment policy

In order to achieve its objective, the Fund will invest principally in a diversified portfolio of different asset classes such as equities, equity linked securities (including warrants and convertible securities), fixed and floating rate debt securities, index linked bonds, cash and cash equivalents. Debt securities (including sovereign and corporate) as well as higher yielding equities will be the dominant asset classes.

The equity part of the Fund's portfolio will contain primarily securities from the leading UK companies (FTSE 350) or their equivalents from overseas markets. The equity part of the portfolio may also consist of, but to a proportionately lesser extent, the securities of smaller companies. The bond part of the Fund's portfolio will contain mainly bonds such as sovereign debt or securities guaranteed by governments and corporate debt with the focus being on medium to high credit quality. The bond part of the portfolio may also consist of, but to a proportionately lesser extent, lower quality bonds.

Past performance is not a guide to future performance.

All performance figures shown are net of underlying fund charges.

*The yield reflects historic distributions declared over the past twelve months as a percentage of the mid-market unit price, as at the date shown and after the deduction of the funds expenses.

**Ongoing charge represents the direct costs of running a fund, which are deducted from the assets of the fund and provide a comparable number for the cost of investing. The annual management charge is included in the ongoing charge.

Fund manager commentary

As Central Banks begin to turn their attention away from the fight against inflation and towards supporting growth, surprisingly large monetary stimulus in two of the world's largest economies (US and China) led to increases in global equities and bonds over the third quarter. In local currency, the S&P 500 rose by 5.5%, the Hang Seng by 19.3% and the MSCI World (ex UK) by 6.2%. The 10-year yield on US government bonds fell from 4.4% to 3.8% over the same time.

Less supportive interest rate differentials however, led to a meaningful fall in the US dollar and therefore, a much less impressive 0% MSCI World (ex UK) performance in sterling terms. The FTSE All Share delivered relative outperformance with a positive 1.3% return, in both local and sterling terms of course.

Since the end of Q1, a broadening out of markets has provided greater opportunity for positive relative returns. In the most recent quarter stock selection within our Property holdings was a particularly positive contributor with a 5.9% return from **LondonMetric Property**, an 8.0% return from **Big Yellow Group** and a 9.4% return from **Workspace**. Performance during the quarter was negatively impacted however by underweight Chinese exposure within our active Asia/EM funds.

The beginning of a rate cutting cycle should provide support for economic growth and therefore, for asset prices looking forward. However, lower rates against the backdrop of already sticky inflation risks pushing up long term inflation expectations and creating a negative environment for long term bonds. Against this, we have maintained a mildly positive stance within the funds with a focus on bottom-up opportunities in the UK and overweight Japanese equity exposure alongside hedges to our constructive macroeconomic view through gold exposure and an overweight position to short duration government bonds.

Important information

Past performance is not a reliable indicator of future results. All performance figures shown are net of underlying fund charges. The value of CSI Income may go down as well as up and you may not receive back all the money you invest. Investment should be made on the basis of the Prospectus and Key Investor Information Document (KIID), available on our website. You should seek professional advice as to the suitability of the Fund before investing. Values may be affected by fluctuations in exchange rates where assets in the Fund are denominated in currencies other than sterling.
